A
Mini Project Report
on
COUPONS SALES!

Developed By

Dhobale Ninad Satish (22)

Wagh Neha Tanaji (109)

In partial fulfilment of

S.Y.B.Sc.(Information Technology) Semester-III

Under
Savitribai Phule Pune University
2025-2026

Dr. D. Y. Patil Arts, Commerce & Science College, Pimpri

Certificate

**Exam Seat No:2039
2004**

This is to certify that **Mr.Ninad Dhobale (22)** and **Ms.Neha Wagh (109)** have successfully completed the IT231FP Mini Project entitled “**Coupon Sales** ” for **S.Y.B.Sc.(Information Technology) Semester-III** of Savitribai Phule Pune University for the Academic Year 2025-26.

Principal

Internal Examiner

External Examiner

ACKNOWLEDGEMENT

We take this opportunity to express my deep gratitude and whole hearted thanks to our coordinator Dr.Vandana Nemane mam and guide Mrs. Amruta Jadhav mam for guidance throughout this work.We are very thankful to mam for their constant encouragement, support and kindness.

We are also grateful to our teachers for their encouragement, help and support from time to time.

We also wish to express our sincere thanks to our Principal Dr.Ranjit Patil sir for providing us a wide range of opportunities, facilities and inspiration to gather professional knowledge and material without which this project could not have been completed.

Ninad Dhobale

Neha Wagh

INTRODUCTION

In the modern consumer landscape, digital coupons, promo codes, gift vouchers, and discount deals have become an integral part of shopping behavior. Brands and retailers frequently issue these incentives to boost customer engagement and drive sales. However, a significant number of these coupons go unused due to limited interest, relevance, or expiration—resulting in wasted value for consumers and missed opportunities for businesses. At the same time, there exists a large segment of price-conscious consumers actively seeking discounts but unable to access specific deals at the right time. Addressing this imbalance, a **Peer-to-Peer (P2P) coupon resale platform** presents an innovative solution.

A P2P coupon resale platform is an **online marketplace** that enables individuals to **buy, sell, or exchange unused coupons, gift cards, and discount codes** directly with one another. The platform acts as a trusted intermediary, facilitating secure transactions, validating coupon legitimacy, and ensuring a smooth user experience. By leveraging the power of community-driven commerce, this platform creates a **circular economy** for digital deals—maximizing coupon utility while empowering users to recover value from items they would otherwise discard.

Unlike traditional coupon aggregator websites that merely collect and list offers from various brands, a P2P model enables **user-generated supply and demand**, fostering a decentralized ecosystem. Sellers can list their unused or surplus coupons, set prices (often below face value), and attract buyers looking for specific discounts. Buyers benefit by accessing deals that may no longer be available through traditional channels or discovering niche offers tailored to their needs.

OBJECTIVE

The primary objective of the Peer-to-Peer (P2P) Coupon Resale Platform is to **create a secure, user-driven marketplace** that enables individuals to **buy, sell, and trade unused or unwanted coupons, vouchers, and discount codes** directly with each other. By doing so, the platform aims to:

1. Maximize the Utility of Digital Coupons : Reduce the number of unused or expired coupons by allowing users to resell them to others who can benefit.

2. Enable Consumer-to-Consumer Value Exchange : Empower users to monetize surplus or irrelevant coupons and access deals that are otherwise unavailable or difficult to find.

3. Promote Financial Savings for All Users : Help budget-conscious purchase desired goods or services at discounted prices by accessing a wide variety of resale coupons.

4. Foster a Trust-Based Digital Community : Build a reliable ecosystem through features such as a user reviews, transaction histories ,and coupon verification to ensure fair and safe exchanges.

5. Encourage Sustainable Digital Consumption

Reduce digital waste by giving coupons a second life, promoting reuse in a circular economy model.

6. Bridge the Gap Between Supply and Demand in Coupon Usage : Match individuals who have unused coupons with those actively seeking discounts, ensuring better market efficiency.

TOOLS/ENVIRONMENT

- **Tools & Environment Required to Build a P2P Coupon Resale Platform**

- **1. Frontend Development**

- **Purpose:** Build user-facing interface for browsing, posting, buying, and selling coupons.

- **Languages:**

- HTML5, CSS3, JavaScript

- **Frameworks/Libraries:**

- **React.js** or **Vue.js** (for dynamic, responsive UI)
- Tailwind CSS / Bootstrap (for fast styling)

- **Tools:**

- Figma / Adobe XD (for UI/UX design and prototyping)
- Vite / Webpack (module bundlers)

2. Backend Development

Purpose: Handle business logic, transactions, user authentication, and coupon data processing.

- **Languages:**

- **Node.js** (JavaScript)
- **Python** (with Django/Flask)
- Or **Ruby on Rails / Java Spring Boot**

- **Frameworks:**

- Express.js (with Node.js)
- Django REST Framework (for Python)

3. Database & Storage

Purpose: Store user data, coupon listings, transaction history, and reviews.

- **Databases:**

- **PostgreSQL / MySQL** (relational DB for structured data)
- **MongoDB** (if flexible schema is preferred)
- **Cloud Storage:**
 - **Amazon S3 or Firebase Storage** (for coupon images and attachments)
- **4. Authentication & Security**
 - **Purpose:** Secure user accounts and data, prevent fraud.
 - **Authentication Providers:**
 - Firebase Auth / Auth0 / OAuth 2.0 (Google, Facebook, etc.)
 - **Security Practices:**
 - SSL/TLS encryption
 - CAPTCHA (to prevent bots)
 - JWT tokens for session management
 - Email/phone verification
- **5. Payment Gateway Integration**
 - **Purpose:** Enable secure payments between buyers and sellers, and optionally charge platform commissions.
 - **Popular Gateways:**
 - **Stripe** (good for marketplaces)
 - **PayPal**
 - **Razorpay / Paystack / Flutterwave** (regional options)
 - **Features Needed:**
 - Escrow system (optional but recommended to hold funds until coupon is verified)
 - Refund mechanisms
- **6. Real-Time Features**
 - **Purpose:** Enable instant updates on coupon availability, chat, notifications, etc.

- **WebSockets / Libraries:**
 - Socket.io (for real-time messaging)
 - Firebase Realtime Database / Firestore (alternative with built-in real-time features)
- **Notification Tools:**
 - OneSignal (push notifications)
 - Email API (SendGrid / Mailgun)

7. Admin Dashboard

Purpose: Monitor transactions, handle disputes, verify coupons, manage users.

- **Tools:**
 - Custom-built admin panel (React/Vue + backend)
- Third-party admin templates (e.g., Metronic, AdminLTE)

8. Hosting & Deployment

- **Purpose:** Deploy and scale the application.

- **Cloud Platforms:**

- **AWS (EC2, S3, RDS)**
- **Google Cloud Platform (App Engine, Firebase)**
- **Heroku** (for easy deployment)
- **Vercel / Netlify** (for frontend hosting)

- **CI/CD Pipelines:**

- GitHub Actions / GitLab CI / Jenkins

9. Version Control & Collaboration

- **Git** (version control)

GitHub / GitLab / Bitbucket (code hosting and collaboration)

10. Optional (but Recommended)

- **Coupon Verification System:** API or manual system to verify coupon validity before reselling.

FUTURE SCOPE

1. Broad P2P Marketplace Growth Signals Vital Opportunity

The P2P marketplace sector is expanding robustly. Forecasts show global market value rising from around **USD 1.5 billion in 2024** to over **USD 8.47 billion by 2034**—a **CAGR of about 18.7%** [FMIBlogWhaTech](#). Other reports align closely, projecting growth to **USD 6.27 billion by 2032** at **CAGR ~19.2%** [Credence Research Inc.](#).

A more specialized segment—**secondhand trading platforms** (e.g. fashion resale)—is forecasted to grow from **USD 13.68 billion in 2024** to **USD 27.04 billion by 2029**, with a **CAGR of ~14.5%** [asiasmallbusinesstimes.com](#).

Takeaway: While coupon resale is niche within this ecosystem, these growth trends reflect favorable user appetite for peer-centric, value-driven resale platforms.

2. Innovation & Technology: Building Trust and Efficiency

Blockchain & Transparency

Blockchain can enhance security, allow tamper-proof coupon verification, and streamline transactions—all critical in resale scenarios [School DrillersWhaTech](#).

AI & Personalization

Machine learning can make search, recommendations, fraud detection, and pricing smarter and fairer [School DrillersParsers VC](#).

Digital IDs & Authenticity

Fashion brand Pangaia introduced digital IDs that carry provenance, condition, and pricing guidance—greatly reducing friction in peer-to-peer resale [Vogue Business](#).

Mobile-First & Seamless UX

A smooth mobile interface is key. Ease of use drives engagement—especially for on-the-go coupon browsing, listing, and purchasing [Parsers VC](#).

3. Why Coupons? A Niche with Strategic Advantages

- **Minimal logistics:** Coupons are digital/low-volume, making them easier to handle than physical goods.
- **High velocity:** Low price points encourage frequent transactions and impulse buying.
- **Environmental alignment:** Facilitates reuse and savings—resonates with eco-conscious Gen Z and Millennials [Cahoot.ai](#).

Scalability: With digital infrastructure, platforms can scale quickly across geographies and categories.

4. Consumer & Market Drivers

- **Eco-driven shoppers:** 68% of Gen Z purchased pre-owned items in the past year [Cahoot.ai](#).
- **Circular economy appeal:** Consumers love platforms that let them re-use and redeem value.
- **Supply leverage:** Brands adopting in-house resale (e.g., SHEIN Exchange) show future alignment and integration potential [asiasmallbusinesstimes.com](#).

5. Strategic Path Forward

- **Develop a lean MVP:** Target specific user segments (e.g., college students, coupon enthusiasts).
- **Prioritize trust features:** Launch digital ID integration, basic escrow, and reviews early.
- **Use community engagement:** Include social features, flash swaps, and referral incentives.
- **Pilot sponsored offers:** Collaborate with brands or coupon issuers to supply verified listings.
- **Scale mobile capabilities:** Ensure discovery and listing via a slick mobile interface.

Layer monetization gradually: Start with freemium features; introduce ads or premium placement later.

APPLICATIONS

Notable Use Cases & Examples

1. Coupon Hub – The Peer-to-Peer Coupon Exchange

A startup featured on Product Hunt, **CouponHub** allows users to **swap unused coupons** with others in their community. It emphasizes convenience and utility—sharing what you don't need and finding discounts you value [Product Hunt](#).

2. SKEEDKA – Daily-Deal Voucher Trading Platform

SKEEDKA enables users to **buy, sell, or auction daily deal vouchers** (e.g., Groupon items). Sellers set reserve prices or accept offers—buyers get savings up to ~80% off face value. SKEEDKA charges a small fee upon sale, giving users a flexible, cost-effective way to offload or obtain discounted vouchers [TrendHunter.com](#).

3. GitHub Project – Coupon-Bank

An open-source concept, **Coupon-Bank** is a P2P platform prototype that allows users to **buy and sell coupons**. It integrates with Stripe for payments, includes watermark protection, and suggests adding features like a middleman mediator and PDF receipts to secure transactions [GitHub](#).

4. Gift Card Resale Platforms (e.g., Gift Card Granny)

While not exactly coupons, platforms like **Gift Card Granny** function similarly—they let users **buy and sell discounted gift cards** from a wide range of retailers, tapping into price-aware consumer behavior and leveraging a P2P marketplace model [Wikipedia](#).

LIMITATIONS

Legal Limitations

1. Terms of Service Violations

- Many coupons or promo codes explicitly prohibit resale in the issuing company's **terms and conditions**.
- Reselling them could lead to **account bans, coupon deactivation, or legal liability**.

2. Intellectual Property (IP) Issues

- Use of brand names, logos, and designs on your platform without permission could lead to **copyright** or **trademark** infringement.

3. Consumer Protection & Fraud

- Regulatory bodies may impose rules regarding the sale of digital goods.
- If users are scammed (e.g., invalid or expired coupons), you may be liable under **consumer protection laws**.

4. Jurisdictional Restrictions

- Laws differ by country and state (e.g., some US states prohibit coupon resale or place limits on it).

Technical Limitations

1. Coupon Validation

- It's difficult to **verify** the legitimacy or expiration status of coupons automatically unless you integrate with issuers (which most won't allow).

2. One-Time Use Codes

- Many promo codes are one-time use, non-transferable, or tied to user accounts—making resale nearly impossible or prone to fraud.

3. Scalability & Security

- As the platform grows, maintaining **secure transactions, fraud prevention, and user data protection** becomes harder and costlier.

Operational Limitations

1. Payment Disputes

- Without an escrow system, disputes over invalid coupons can damage platform trust.
- Implementing buyer/seller protections is technically and financially complex.

2. Refunds and Chargebacks

- High rates of chargebacks (especially if buyers feel scammed) can lead to being banned by payment processors.

3. Lack of Support from Coupon Issuers

- Brands and merchants won't help resolve issues related to resold or transferred coupons.
-

Ethical and Reputational Limitations

1. Undermining Retailer Promotions

- Coupon resale can damage relationships between businesses and their customers by **devaluing promotions** intended for specific audiences.

2. Facilitating Fraud

- Some users may attempt to sell fake or reused codes, hurting legitimate users and the brand reputation of your platform.

3. Platform Trust

- Building and maintaining trust on a P2P platform is difficult, especially when high-value digital goods are involved.
-

Workarounds or Mitigations (Not Always Legal)

- **Escrow System:** Hold payment until the buyer confirms coupon validity.
- **Reputation System:** Buyer/seller reviews to identify trustworthy users.
- **Terms Enforcement:** Require sellers to verify they own the coupon and it's transferable (though hard to enforce). **Category Filtering:** Allow resale only of **transferable or gift card-like** promo codes.

Investigates variables that affect coupon redemption (distance, context, etc.), which is useful for understanding how and when people might use coupons acquired through resale. [arXiv](#)

Platforms / Real-World Examples / Case Studies

1. **Gift Card Granny**
A U.S. site where consumers can buy discounted gift cards or sell gift cards at below face value. It’s not exactly “coupon resale” but shares similarities with resale of discount value. [Wikipedia](#)
2. **8coupons**
Aggregates deals, coupons, locally relevant offers. More of a coupon aggregator/distributor, not resale, but shows how coupons are curated, shared, and delivered. [Wikipedia](#)
3. **Voucherify**
Offers a coupon/discount management platform with case studies, though not specifically peer-to-peer resale. Useful for understanding how promotions are managed at scale. [Case Studies](#)

4. Mezzofy

Platform that allows merchants to create and distribute digital coupons; demonstrates how tracking, redemption, distribution of coupons work in digital format. [Mezzofy](#)

Gaps & Considerations

- There seems to be little published work *specifically* about platforms where users **resell or trade** coupons or discount codes. Most literature is about coupon distribution, redemption, promotions strategy, or resale of physical/digital goods (but not coupon codes).
- Key challenges for a coupon resale platform (from related research) would include:
 - **Validity / Fraud:** ensuring coupons sold/traded are valid, not expired, not violating terms of issuers.
 - **Marketplace Trust:** buyer / seller ratings, escrow or guarantees.
 - **Legal / Terms of Service:** many issuers' coupon or gift card T&Cs may prohibit resale.
 - **Pricing Strategy:** setting a fair price; balancing supply and demand.
 - **User Experience:** searchability, ease of listing, authentication, transparency.

THANK

YOU...
